

Ubuntu Server Secure - A script to secure and harden Ubuntu

2016-09-09 12:13:10 by meshal

Today, I have stumbled upon an useful script, which is used to secure your Ubuntu OS with simple mouse clicks. You don't need to be an experienced Linux administrator to use this. All you need to do is just download, extract, and run the script. This script will take care of everything.

our job is to click YES or Cancel. That's it, Plain and simple. [The Fan Club](#) team have created a simple GUI script called "Ubuntu Server Secure (shortly USS)", that consists of popular GUI security administration tools to harden and audit the security on an Ubuntu Desktop or Server operating system. This script will install and configure all required applications automatically in the background.
